CONTENTS

A.I. Abdulnagimov, A.S. Krivosheyev

Representation of analytic functions
pp. 3-23

G.L. Alfimov, P.P.Kizin

On solutions of Cauchy problem for equation $u_{xx} + Q(x)u - P(u) = 0$ without singularities in a given interval
pp. 24-42

M.Sh. Badakhov, A.B. Shabat

Darboux transformations in the inverse scattering problem
pp. 43–52

R.N. Garifullin

On simultaneous solution of the KdV equation and a fifth-order differential equation
pp. 53–62

D.B. Davletov, D.V. Kozhevnikov

The problem of Steklov type in a half-cylinder with a small cavity
pp. 63–89

K.P. Isaev, A.V. Lutsenko, R.S. Yulmukhametov

On unconditional exponential bases in weak weighted spaces on segment
pp. 90–99

M. Kostić, V.E. Fedorov

Degenerate fractional differential equations in locally convex spaces with a σ-regular pair of operators
pp. 100–113

S.Yu. Lukashchuk

Symmetry reduction and invariant solutions for nonlinear fractional diffusion equation with a source term
pp. 114-126

I.Kh. Musin

Perturbation of a surjective convolution operator
pp. 127–134

A.V. Nekludov

On solutions of second order elliptic equations in cylindrical domains
pp. 135–146

Yu.Kh. Khasanov

On absolute Cesáro summablity of Fourier series for almost-periodic functions with limiting points at zero
pp. 147–155

A.Ya. Khrystiyanyn, A.A. Kondratyuk

Modulo-loxodromic meromorphic functions in $\mathbb{C} \setminus \{0\}$
pp. 156–162

Abstracts
pp. 163–166

Contents
pp. 167–168
