ISSN 2074-1863 Уфимский математический журнал. Том 3. № 1 (2011). С. 117-118.

CONTENTS

K.P. Isaev, R.S. Yulmukhametov

Unconditional exponential bases in Hilbert spaces
pp. 3–15

L.S. Maergoiz, N. Tarkhanov

An analogue of the Paley-Wiener theorem and its applications to optimal recovery of entire functions
pp. 16–30

V.V. Napalkov(Jr.)

On orthosimilar systems in a space of analytical functions and the problem of describing the dual space
pp. 31–42

D.K. Potapov

Estimation of the bifurcation parameter in spectral problems for equations with discontinuous operators
pp. 43–46

A.A. Putintseva

Riesz bases in weighted spaces
pp. 47–52

Saks R.S.

Cauchy problem for the Navier-Stokes equations, Fourier method
pp. 53–79

S.Ya. Startsev

Necessary conditions of Darboux integrability for differential-difference equations of a special kind
pp. 80–84

A.Y. Timofeev

Construction of functions with determined behavior $T_G(b)(z)$ at a singular point
pp. 85–93

P.V. Filevych

On the growth of the maximum modulus of an entire function depending on the growth of its central index
pp. 94–102

Kh.A. Khachatryan

On solvability of one class high-order nonlinear integro-differential equations with Hammerstein type noncompact integral operator
pp. 103–112

Abstracts
pp. 113–116

Contents
pp. 117–118

Information for authors
pp. 119–121

In memory of M.A. Shamsutdinov
pp.122–123
